

Marque Publishing — MailerLite Punch List

Complete these steps in your browser to finish the welcome-email automation.

1 Open the Welcome Email Automation

- Go to **dashboard.mailerlite.com** → **Automations** → **Drafts**
- Click **Edit** on the draft called "Simple welcome email"

The trigger is already wired to the **Newsletter** — **All** group (green checkmark).

2 Configure the Email Step

- Click the **Email 1** block (it has a red warning icon)
- Set the **Subject line**: *Welcome to Marque Publishing*
- Set **Sender name**: *Chris Thatcher*
- Set **Sender email**: *chris@marquepublishing.com*
- Click **Design email** (pick "Rich text" for the simplest option)

3 Write the Welcome Email

Suggested content — keep it short and warm:

Hi {\$name|there},

I am Chris Thatcher — author, cybersecurity veteran, and the voice behind Marque Publishing. You will hear from me when there is something worth sharing: new book announcements, behind-the-scenes writing notes, and the occasional deep dive into AI, security, or the craft of storytelling.

In the meantime, explore the site: **marquepublishing.com**

— Chris

- Click **Done editing** when finished

4 Activate the Workflow

- Back on the workflow canvas, click the green **Activate** button (top right)
- Confirm activation when prompted

Once active, every new subscriber via the site forms gets this email automatically.

5 Test It

- Open **marquepublishing.com** (use the staging URL for now)
- Subscribe with a test email address
- Confirm the welcome email arrives in the test inbox
- Check MailerLite → Subscribers to verify the contact appeared

Other items still pending (not MailerLite):

- Provide a photo of Jayden Thatcher (replace placeholder icon on About and Labs pages)

- Decide when to go live — swap root URL from placeholder to real site
