

CHAPTER 10

Make It Yours Forever

Build your personal Claude system

The piece	What it is	Why it matters
Prompt library	Your best prompts, saved and organized by use case	You never start from scratch or lose what works
Rules document	Written instructions for how Claude should work with you	Claude follows your standards without guessing
Templates	Reusable structures for recurring work	Consistency without reinventing every time
Workflows	Multi-step processes with automated and manual parts	Routine runs itself; you focus on judgment calls
Model selection	Right model for the task: Haiku, Sonnet, or Opus	Better output without wasting time or usage

The System, in One Breath

Save what works (prompts) → structure what repeats (templates) → automate what you can (workflows) → refine as you go.

The Creator's Checklist

- **Is this accurate?** Your name is on it.
- **Is this honest?** Say how you work.
- **Is this something you're proud of?** The bar goes up, not down.

*This reference card is a companion to Chapter 10 of Creating with Claude by Chris Thatcher.
